Logic of the Course
This course offers an overview of sociological theory and research on juvenile delinquency. We start by critically examining the social facts surrounding the measurement, extent, and distribution of delinquency. Next, we study the principal sociological explanations of delinquent behavior. These theories provide conceptual tools for analyzing monographs detailing delinquency among groups such as Seattle grunge rockers and Los Angeles gang members. Throughout, we analyze the success or failure of key programs implemented in attempts to reduce delinquency.

Objectives of the Course
• To understand how delinquency is currently measured and the extent and distribution of delinquent behavior according to these measures.
• To gain a working knowledge of the key sociological theories of delinquency.
• To apply the conceptual tools of these theories to selected case studies.
• To critically evaluate concrete policy responses to delinquency.

Required Texts (at West Bank bookstore)

Course Requirements
10% Active class participation. Come to lecture prepared to discuss the day’s readings.
10% Short Exercises. Group discussion write-ups, visits, and short individual assignments.
25% Midterm examination. The extent and distribution of delinquency, sociological theories of delinquency, and their application to particular scenarios.
25% **Working Paper or Service Learning Option.** Uggen’s paper assignment or an article-length research paper or grant proposal on a topic negotiated with the professor and teaching assistant. See Uggen for information about the Service Learning alternative to the paper assignment.

30% **Final examination.** This exam is cumulative, but focuses on connecting sociological theories with efforts to prevent and control delinquency.

**Course Policies and Friendly Reminders**

- **Late Assignments/Missed Exams.** Assignments, exams, and readings should be completed by the beginning of class on their due date. Late work will be penalized 10% per day. Please document any family or medical emergency and notify the professor or TA before class (email preferred).
- **Class Notes.** If you must miss class, copy the notes from one of your classmates. Then see the TA or professor to clarify anything you do not understand. We will also make PowerPoint outlines available online at [www.soc.umn.edu/~uggen/4141](http://www.soc.umn.edu/~uggen/4141)
- **Grading.** At the end of the semester, I compute a total score for each student (for example, 83.5 out of 100 possible points). I then make cut-points for the grades based on the class distribution of scores. I try to ensure that students who do all the reading, attend the lectures, and participate actively can generally earn grades of B or better in my classes. Blowing off readings or lectures is almost certain to hurt your grade.
- **Attendance.** We will not be taking attendance in class, but missing lecture more than once or twice is likely to compromise your participation grade.
- **Reading.** This is a reading-intensive upper-division course. You should read and understand about 100 pages weekly (before the appropriate lecture). The readings are not typically repeated in lecture and the lectures are not duplicated in the readings.
- **Offensive Material.** Juvenile delinquency encompasses behaviors ranging from minor deviance to severe crime. In this course, healthy, well-adjusted students may encounter language, depictions, or attitudes that they find disturbing or offensive. The teaching assistant and professor will be available to discuss any concerns you have with course materials.
- **Plagiarism/Academic Misconduct.** You do not need to cheat. You do not want to cheat. Bad things will happen if you cheat. Do not cheat.
- **Teaching Philosophy and Department Policies** (attached).

Uggen's Teaching Goals and Philosophy

1. **Respect for Students.**
   The other points are really a subset of this one. Education is a service industry, but you cannot simply purchase a unit of education the way you would buy other commodities. Instead, you must devote time and energy to learning. I respect those students who must make work, family, or other commitments their top priority. Nevertheless, to benefit from the class and to be rewarded with a high grade, you must find time to do the work.

2. **Procedural Justice or Fairness.**
   In my non-statistics classes, I typically grade exams and papers anonymously (by identification numbers rather than names) to avoid favoritism or other biases. Universal standards and strict deadlines are the best way I know to provide equal opportunities for all students.

3. **High Standards for Excellence.**
   I reserve grades of A for outstanding work that engages course materials with original thought and creativity or a mastery of technical skills. You can receive a B by doing all of the work well and a C by meeting all course requirements.

4. **Opportunities for Independent Work.**
   All must meet the basic requirements. For those wishing to engage the material at the highest level, I allow flexibility for more ambitious projects.

5. **Responsiveness and Accountability.**
   You will have the opportunity to evaluate me and to critique the course in time for me to make changes that will benefit you. If you think I have failed to live up to the principles or philosophies here listed, please let me know about it.

6. **Accessibility.**
   I will be available to you during office hours and flexible in scheduling appointments outside these hours (including nights and weekends).

7. **Openness to Diverse Perspectives.**
   Sharing your experiences and understandings (publicly or privately) enriches the course for your fellow students, especially when you disagree with me.

8. **Enthusiasm for the Subjects I Teach and for Teaching as a Vocation.**
   I cannot expect you to really engage the course materials if I am bored with them. Therefore, I will make every effort to make the texts, lectures, and assignments current, relevant, and intellectually engaging.

9. **Skills, Knowledge, and Attitudes.**
   I teach: (1) technical and life skills that will benefit you inside and outside of the classroom; (2) abstract and concrete knowledge about the social world; and, (3) attitudes promoting the free and good-humored exchange of ideas.
Your goal is to design a program to prevent or control juvenile delinquency. My goal is to test your ability to merge theory and practice, but I sincerely hope the paper helps you pursue or develop your own career interests. Your double-spaced typed paper is due at the start of class on Thursday, April 17.

I. Introduction [1-2 paragraphs]
   • Summarize the problem, target group, theoretical rationale, operations and goals for your program. It is usually easiest to write this part last, rather than first.

II. Current State of Knowledge [2 pages]
   • What do we know about the success of similar programs?
   • I want at least 5 academic sources (e.g. texts and journals). You may also cite government publications, program literature, and personal interviews with academics or practitioners.
   • Try to make a critical, unbiased evaluation of existing sources (Lundman provides a good example of the appropriate “tone”). Don’t “oversell” your approach.

III. Theoretical Rationale of Your Program [2-3 pages]
   • Summarize the delinquency theory your program is based upon in a paragraph or two. In your own words, explain how the theory works. You may draw on theories from social work, psychology, or other disciplines, but connect these ideas to the sociological theories in this class.
   • Note the level of analysis (e.g., individual, state) appropriate to the theory and program.
   • Explain how the theory specifically applies to the problem, program, and target group you are considering. How will you apply the theory’s conceptual tools in this program?
   • Flow diagrams (e.g. Lundman: 191) are helpful, but always discuss them in the text.

IV. Program Narrative [1-2 pages]
   • Describe the program’s day-to-day operations in concrete terms. Each will vary, but you might discuss referral and outreach (where you find clients), eligibility requirements, site, duration, participating organizations, and other factors.

V. Goals and Objectives [1 page]
   • State measurable program outcomes (e.g. decrease unemployment rate; increase graduation rate, decrease self-reported delinquency, increase self-esteem).
   • [Grant applications need an “administration” or “organization and management” section outlining timetable, budget, personnel, etc. You needn’t include this, but are welcome to try!]

VI. Evaluation and Conclusion [1-page]
   • Outline a strategy to measure performance, or program results
   • Briefly summarize your proposal and make your final pitch for funding.

VII. Bibliography [1 page]
   • I would like to see about 5-10 decent sources referenced.
   • Credit all sources (names, dates, titles, page numbers, etc.) so I can refer to them if necessary.

NOTE: In a “working paper,” the polish is less important than the quality of your thinking and your ability to integrate abstract concepts with concrete reality. Nevertheless, you must communicate your ideas clearly to make an effective proposal. You will be graded on clarity and the specificity and appropriateness of the literature and program design, as well as the overall logic and internal consistency of your argument.
